PUBLIC STATEMENT OF PAT LEPPALA

DEC 09 1999

MS. LEPPALA: I can't follow that act.

EIS000635

My name is Patti Leppala. I live in Crescent Valley.

When John Glenn was going up in the space capsule, people asked him, how did you feel? He said, every component of the space capsule was let to the lowest bidder.

1 You know, we're all in that space capsule this evening because it seems like on the railway tracks, this nuclear waste is going to be let out to the lowest bidder. I can only assume that, but it's going to a private contractor that will be taking it down the track.

2 Now, on the wall is a map, and in the DEIS statement is a map, and the two maps are different as far as the corridor. I want this registered. It's 6-59, and on page 6-61, it tells where the railway is going through, but there are two towns that aren't really towns that are inhabited any more, and that's Gold Acres and Tenabo, and we would like you to look at that because this is also inaccurate.

3 I feel that all of the nuclear waste should be stored on site as it is. I would like to see it monitored. I would like to see a reasonable no action alternative presented. And I'm very concerned
1 continued about the lowest bidder hauling our nuclear waste. Thank you.
